Tadka & Time User Manual

Version: 1.1.22

Backend: <https://pvcraving.onrender.com>

APK download: <https://pvcraving.onrender.com/downloads/tadka%26time1.apk>

English

1. What This App Does

Tadka & Time is a multi-role food ordering and meal-kit app.

Customers can browse meals, add items for one or more persons, customize a weekly meal box, pay online or choose cash on delivery, and track orders.

Suppliers can add meals, upload photos, manage stock, mark items sold out, edit/delete items, create promotions, and manage incoming orders.

Delivery partners can view assigned orders, accept or reject delivery work, follow route priority, update delivery status, collect COD, and mark orders delivered.

Admins can manage users, suppliers, delivery partners, inventory, promotions, and overall business controls.

2. Demo Logins

Use these accounts for testing:

Role	User ID	Password
Customer	customer1	123456
Supplier	supplier1	123456
Delivery	delivery1	123456
Admin	admin1	admin123

3. Install The Android App

1. Open this link on your Android phone:

<https://pvcraving.onrender.com/downloads/tadka%26time1.apk>

1. Download the APK.
2. If Android asks permission, allow install from browser/file manager.
3. Tap Install.
4. Open **Tadka & Time**.

If Android shows "App not installed", uninstall the old Tadka & Time app first, then install again.

4. Login And Update

1. Open the app.
2. If an update is available, the login screen shows an update dialog.
3. Tap **Update now** to download the latest APK.
4. Enter User ID and Password.
5. Enable **Remember me** if you want the app to restore your session.
6. Tap **Login**.
7. Use **Sign up** to create a new User, Supplier, or Delivery account.

Fields marked with * are mandatory. Optional fields can be left empty. Mobile fields require a valid registered 10-digit Indian mobile number.

5. Role-Based User Manual

After login, open the 3-dot menu and choose **User Manual**.

- The manual opens in a fullscreen book-style view.
- The left side shows the index on tablet/desktop.
- Mobile shows the index as scrollable chips at the top.
- Tap any section to switch content.
- Content changes automatically by role:
 - Customer: browsing, cart, wallet, tracking, shared shopping
 - Supplier: product upload, order handling, inventory, earnings
 - Delivery: duty, route priority, pickup, delivery status
 - Admin: users, orders, margin setup, supplier payouts

6. Customer Guide

Open the customer account using **customer1 / 123456**.

Profile And Delivery Address

- Open the 3-dot menu and choose **Profile**.
- Profile photo is optional. Tap the camera button to upload or change your photo.
- Add a delivery address with label, house/street, landmark, city, and pincode.
- The profile screen shows the saved address like a delivery card, so checkout stays faster and clearer.

Meals

- Browse meals by category.
- Each meal shows stock left, person count, weight, calories, and price.
- Tap **Add** to add one person serving.
- After adding, use **+** and **-** to increase or decrease person count.
- Stock reduces visually as you add items.
- Tap the recipe/book icon to see recipe details.

Weekly Meal Box

- Open **Plans**.
- Choose **Customize weekly meal**.
- Add meals day-wise.
- One day can contain multiple meals.
- If the same item is added again, the person count increases.
- Different items appear as separate rows.

- Create the package after final selection.

Cart

- Open **Cart**.
- Check item quantity, total grams, calories, stock left, and total price.
- Add customer name, mobile number, delivery address, and delivery note.
- Choose delivery slot:
 - Express 25-35 min
 - Today 7-9 PM
 - Tomorrow 8-10 AM
- Choose payment:
 - Wallet: pays from wallet first. If the wallet covers full amount, no extra payment is needed.
 - Online payment: UPI, Card, Net Banking through Razorpay.
 - Cash on delivery: cash is separate from wallet and turns wallet usage off.
- Tap **Pay with wallet**, **Pay & place order**, or **Place COD order** based on selected method.
- Wallet add money uses Razorpay only. Cash top-up is not available for wallet balance.
- If Razorpay is not configured, use full wallet payment or Cash on Delivery.

Order Tracking

- Open **Orders**.
- Tap an order to track it.
- The tracking screen shows order total, delivery slot, location, delivery partner, and status timeline.
- Status flow:
 - Payment pending
 - Order accepted
 - Preparing
 - Ready
 - Out for delivery
 - Delivered
- If maps/location is enabled, the route and delivery partner movement are shown.

Rating And Support

- After delivery, rate the delivery/service when the option is available.
- Use support if there is an issue with order, delivery, payment, or food.

Shared Shopping

Shared Shopping is only for customer accounts.

- Open the 3-dot menu and choose **Shared Shopping**.
- Enter another registered customer mobile number.
- Saved members show profile photo and name. If a photo is not uploaded, initials are shown.
- Mobile number must be a valid registered 10-digit customer number before the list/request can be sent.
- Write the shopping list like a simple note, one item per line, for example **Tomato 1 Kg** .
- Use smart suggestion chips while typing to add common grocery items quickly.
- Tap **Send request**. The other customer receives a notification and request card.
- The assigned member accepts or rejects the list.
- After accepting, the member marks every item with check for found or cross for not found.
- The sender can delete items until the list is marked **Final / lock**.
- Both users can monitor progress live. When every item is checked or crossed, the sender can close the list.
- Closed lists become read-only history.
- Family Shopping may show a compact offer/poster uploaded by Admin. The poster auto-fits and does not disturb list cards.
- Offer posters auto-scroll one by one. You can also swipe manually; dots show the current poster.

7. Supplier Guide

Open the supplier account using **supplier1 / 123456** .

Dashboard

Supplier dashboard shows:

- Total items
- Total income/sales
- Order cards
- Inventory status
- Promotions/advertisements

Add A Meal

1. Tap **Add item**.
2. Enter meal name, category, description, supplier price, weight, calories, and stock.
3. Upload a food photo.
4. Use AI price assistant for suggested supplier price, weight, and calories.
5. Save the item.

Customer selling price is controlled by Admin margin rules. Supplier should maintain correct supplier price and stock.

Manage Meals

Supplier can:

- Edit item details
- Delete item
- Mark item sold out
- Set stock quantity
- Update photo
- Update recipe details

Customers see remaining stock and sold-out status in the app.

Promotions

Supplier can create promotional banners for new items or offers. These appear on the customer Meals page.

Supplier accounts do not have access to Shared Shopping. That feature is customer-only for privacy and security.

Orders

Supplier can view incoming orders and update status:

- Accepted
- Preparing
- Ready / Packed
- Assigned for delivery

Customer tracking updates according to supplier action.

8. Delivery Partner Guide

Open the delivery account using **delivery1 / 123456** .

Dashboard

Delivery dashboard shows:

- Pending orders
- Completed orders
- Route priority
- Order value
- Delivery distance/floor/lift information where available

- Duty status
- Admin offers/announcements may appear as a compact auto-scrolling banner. These ads never block order actions.

Duty On/Off

- Turn duty on when ready for deliveries.
- Turn duty off when unavailable.

Accept Or Reject

- Review assigned order.
- Accept if you can deliver.
- Reject if not possible.

Delivery Flow

1. Open assigned order.
2. Check pickup location and customer location.
3. Use route/map button.
4. Mark picked when order is collected.
5. Update out for delivery.
6. Call customer if needed.
7. Collect COD if order is cash on delivery.
8. Mark delivered.

9. Admin Guide

Open admin account using `admin1 / admin123` .

Admin can:

- View users
- Manage suppliers
- Manage delivery partners
- Enable/disable accounts
- Delete users when required
- View revenue and activity summaries
- Use the **Tadka & Time Ops** panel for revenue, profit, users, supplier, stock, and live-health details in one responsive area.
- Set global, category-wise, and product-wise margins
- Review dynamic customer selling price from supplier price
- Review Razorpay fee, net amount, and admin profit
- Create supplier payouts and mark processing/paid
- Manage inventory controls
- Review promotions and app activity
- Upload advertisements and choose placement: **Meals, Family Shared Shopping, Delivery Dashboard**, or **All three places**.
- Uploaded advertisements show as an auto-scrolling carousel with swipe support and dots.
- Keep Shared Shopping customer-only. Supplier, Delivery, and Admin accounts are blocked from shared customer lists.

10. Payments

Cash on delivery works directly.

Online payment works when Razorpay keys are configured in the backend:

- UPI
- Card
- Net Banking

Wallet add money is online-only through Razorpay. Cash wallet top-up is not available.

Wallet checkout uses internal wallet balance first. Cash on delivery is a separate payment method and does not deduct wallet balance.

Payment status, gross amount, Razorpay fee estimate/actual fee, net amount, and admin profit are stored with the order.

11. Margin And Supplier Payout

Admin controls margin from **Admin dashboard → Pricing, margin and payouts.**

Margin priority:

1. Product margin
2. Category margin
3. Global margin

Margin can be percentage or fixed amount.

Example:

- Supplier price: ₹100
- Global margin: 20%
- Selling price: ₹120
- Razorpay fee: ₹3
- Admin profit: ₹17
- Supplier earns: ₹100 after delivery completion

After an order is delivered, supplier payout balance increases automatically. Admin can create a payout request, mark it processing, then mark it paid after settlement.

12. Location, Device Tracking And Privacy

Location tracking is permission based.

- Customer, Supplier, and Delivery accounts can share live GPS location after Android location permission is allowed.
- Delivery tracking can continue while the app is minimized where Android allows it. Android may show a visible **Tadka & Time live tracking** foreground notification.
- The backend stores app audit records for support and security: login event, app start, app update, app version, app install ID, device model, OS version, IP address, and GPS point if permission is granted.
- The app does not collect IMEI or hidden hardware identifiers. It uses an app-generated install ID.
- Users can stop GPS access anytime from Android App Settings → Permissions → Location.
- Admin can review recent telemetry for safety, support, and delivery investigation.

13. Auto Update

The app checks:

GET <https://pvcraving.onrender.com/app/version>

If a newer version exists, the app shows an update dialog on login.

Current latest APK:

<https://pvcraving.onrender.com/downloads/tadka%26time1.apk>

14. Troubleshooting

Problem	Solution
App not installed	Uninstall old app, download latest APK, install again
Login failed	Check user ID/password and internet connection
Online payment disabled	Add Razorpay keys in backend environment variables
Map not showing	Add valid Google Maps API key or use route button
Data not loading	Check backend health: https://pvcraving.onrender.com/health
Old version shown	Download latest APK from update link
Location not updating	Allow Location permission, keep GPS on, and check that Android has not restricted background activity

Hindi / हिंदी

1. यह ऐप क्या करता है

Tadka & Time एक multi-role food ordering और meal-kit app है।

Customer meals browse कर सकता है, items add कर सकता है, weekly meal box customize कर सकता है, online payment या cash on delivery चुन सकता है, और order track कर सकता है।

Supplier meals add कर सकता है, photo upload कर सकता है, stock manage कर सकता है, item sold out कर सकता है, edit/delete कर सकता है, promotion बना सकता है, और orders manage कर सकता है।

Delivery partner assigned orders देख सकता है, delivery accept/reject कर सकता है, route priority follow कर सकता है, COD collect कर सकता है, और delivered mark कर सकता है।

Admin users, suppliers, delivery partners, inventory, promotions और business controls manage कर सकता है।

2. Demo Login

Testing के लिए ये accounts use करें:

Role	User ID	Password
Customer	customer1	123456
Supplier	supplier1	123456
Delivery	delivery1	123456
Admin	admin1	admin123

3. Android App Install कैसे करें

1. Android phone में यह link खोलें:

<https://pvcraving.onrender.com/downloads/tadka%26time1.apk>

1. APK download करें।
2. Android permission मांगे तो browser/file manager से install allow करें।
3. Install पर tap करें।
4. **Tadka & Time** app open करें।

अगर "App not installed" आए, तो पहले पुराना Tadka & Time app uninstall करें, फिर नया APK install करें।

4. Login और Update

1. App open करें।
2. अगर update available है, login screen पर update dialog दिखेगा।
3. **Update now** पर tap करके latest APK download करें।
4. User ID और Password enter करें।
5. **Remember me** enable करें अगर session save रखना है।
6. **Login** पर tap करें।
7. नया account बनाने के लिए **Sign up** use करें। User, Supplier या Delivery role चुन सकते हैं।

जिन fields पर * लगा है वे mandatory हैं। Optional fields खाली छोड़ी जा सकती हैं। Mobile fields में valid registered 10-digit Indian mobile number जरूरी है।

5. Role-Based User Manual

Login के बाद 3-dot menu खोलें और **User Manual** चुनें।

- Manual fullscreen book-style view में खुलेगा।
- Tablet/desktop पर left side में index दिखेगा।
- Mobile पर index ऊपर scrollable chips में दिखेगा।
- किसी भी section पर tap करके content बदल सकते हैं।
- Content user role के हिसाब से automatically बदलता है:
- Customer: browse, cart, wallet, tracking, shared shopping

- Supplier: product upload, order handling, inventory, earnings
- Delivery: duty, route priority, pickup, delivery status
- Admin: users, orders, margin setup, supplier payouts

6. Customer Guide

Customer account: **customer1 / 123456**

Profile और Delivery Address

- 3-dot menu खोलें और **Profile** चुनें।
- Profile photo optional है। Camera button से अपनी photo upload/change कर सकते हैं।
- Delivery address में label, house/street, landmark, city और pincode save करें।
- Profile screen saved address को delivery card की तरह दिखाती है, जिससे checkout fast और clear रहता है।

Meals

- Category के हिसाब से meals browse करें।
- हर meal में stock left, person count, weight, calories और price दिखाता है।
- **Add** tap करने पर 1 person serving cart में add होती है।
- Add के बाद **+** और **-** से person count बढ़ा/घटा सकते हैं।
- Item add करते समय stock visually कम होता है।
- Recipe/book icon से recipe details देख सकते हैं।

Weekly Meal Box

- **Plans** खोलें।
- **Customize weekly meal** चुनें।
- Day-wise meals add करें।
- एक day में multiple meals add हो सकते हैं।
- Same item दोबारा add करने पर person count बढ़ेगा।
- Different item अलग row में आएगा।
- Selection complete होने पर package create करें।

Cart

- **Cart** खोलें।
- Items, quantity, total grams, calories, stock left और total price check करें।
- Customer name, mobile number, delivery address और delivery note भरें।
- Delivery slot चुनें:
- Express 25-35 min
- Today 7-9 PM
- Tomorrow 8-10 AM
- Payment option चुनें:
- Wallet: पहले wallet balance से payment होगा। अगर पूरा amount wallet से cover हो गया तो extra payment नहीं लगेगा।
- Online payment: Razorpay से UPI, Card, Net Banking।
- Cash on delivery: cash wallet से अलग है और cash choose करने पर wallet usage off हो जाएगा।
- चुने हुए method के हिसाब से **Pay with wallet**, **Pay & place order** या **Place COD order** tap करें।
- Wallet add money सिर्फ Razorpay से होगा। Wallet balance में Cash top-up option नहीं है।
- Razorpay configure नहीं है तो full wallet payment या Cash on Delivery use करें।

Order Tracking

- **Orders** खोलें।
- किसी order पर tap करके track करें।
- Tracking screen में order total, delivery slot, location, delivery partner और status timeline दिखाता है।
- Status flow:
- Payment pending
- Order accepted

- Preparing
- Ready
- Out for delivery
- Delivered
- Maps/location enabled होने पर route और delivery partner movement दिखेगा।

Rating और Support

- Delivery complete होने के बाद rating option आने पर rating दें।
- Order, delivery, payment या food issue के लिए support option use करें।

Shared Shopping

Shared Shopping सिर्फ customer accounts के लिए है।

- 3-dot menu खोलकर **Shared Shopping** चुनें।
- दूसरे registered customer का mobile number डालें।
- Saved members में member की photo और name दिखेगा। Photo upload नहीं है तो initials दिखेंगे।
- Mobile number valid registered 10-digit customer number होना चाहिए, तभी request/list send होगी।
- List को simple note की तरह लिखें, हर item नई line में, जैसे **Tomato 1 Kg** ।
- Typing करते समय smart suggestion chips से common grocery items जल्दी add कर सकते हैं।
- **Send request** दबाएं। दूसरे customer को notification और request card दिखेगा।
- Assigned member list accept या reject कर सकता है।
- Accept करने के बाद member हर item पर check लगाएगा अगर item मिल गया, या cross लगाएगा अगर item नहीं मिला।
- Sender list को **Final / lock** करने से पहले items delete कर सकता है।
- दोनों users live progress देख सकते हैं। सभी items check/cross होने के बाद sender list close कर सकता है।
- Closed lists read-only history में चली जाती हैं।
- Family Shopping में Admin द्वारा upload किया गया compact offer/poster दिख सकता है। Poster auto-fit होता है और list cards को फैलाता नहीं है।
- Offer posters अपने आप एक-एक करके auto-scroll होते हैं। User manually swipe भी कर सकता है और dots current poster बताते हैं।

7. Supplier Guide

Supplier account: **supplier1 / 123456**

Dashboard

Supplier dashboard में दिखता है:

- Total items
- Total income/sales
- Order cards
- Inventory status
- Promotions/advertisements

Meal Add करना

1. **Add item** tap करें।
2. Meal name, category, description, supplier price, weight, calories और stock enter करें।
3. Food photo upload करें।
4. Suggested supplier price, weight और calories के लिए AI price assistant use करें।
5. Item save करें।

Customer selling price Admin margin rules से control होती है। Supplier को supplier price और stock सही रखना है।

Meals Manage करना

Supplier कर सकता है:

- Item edit
- Item delete
- Sold out mark
- Stock quantity set

- Photo update
- Recipe details update

Customer को app में stock left और sold-out status दिखाता है।

Promotions

Supplier new items/offers के लिए promotional banners बना सकता है। ये customer Meals page पर दिखाते हैं।

Supplier account में Shared Shopping access नहीं होता। Privacy और security के लिए यह feature सिर्फ customer accounts के लिए है।

Orders

Supplier incoming orders देख सकता है और status update कर सकता है:

- Accepted
- Preparing
- Ready / Packed
- Assigned for delivery

Supplier action के हिसाब से customer tracking update होती है।

8. Delivery Partner Guide

Delivery account: **delivery1 / 123456**

Dashboard

Delivery dashboard में दिखाता है:

- Pending orders
- Completed orders
- Route priority
- Order value
- Delivery distance/floor/lift information जहां available हो
- Duty status
- Admin offers/announcements compact auto-scrolling banner की तरह दिख सकते हैं। ये order actions को block नहीं करते।

Duty On/Off

- Delivery लेने के लिए duty on करें।
- Available नहीं हैं तो duty off करें।

Accept या Reject

- Assigned order check करें।
- Deliver कर सकते हैं तो accept करें।
- Possible नहीं है तो reject करें।

Delivery Flow

1. Assigned order खोलें।
2. Pickup location और customer location check करें।
3. Route/map button use करें।
4. Order collect होने पर picked mark करें।
5. Out for delivery update करें।
6. जरूरत हो तो customer को call करें।
7. COD order हो तो cash collect करें।
8. Delivered mark करें।

9. Admin Guide

Admin account: **admin1 / admin123**

Admin कर सकता है:

- Users देखना

- Suppliers manage करना
- Delivery partners manage करना
- Accounts enable/disable करना
- जरूरत होने पर users delete करना
- Revenue और activity summary देखना
- **Tadka & Time Ops** panel में revenue, profit, users, supplier, stock और live-health details एक responsive area में देखना
- Global, category-wise और product-wise margin set करना
- Supplier price से dynamic customer selling price review करना
- Razorpay fee, net amount और admin profit review करना
- Supplier payout create करना और processing/paid mark करना
- Inventory controls manage करना
- Promotions और app activity review करना
- Advertisement upload करके placement चुनना: **Meals, Family Shared Shopping, Delivery Dashboard**, या **All three places**
- Uploaded advertisements auto-scrolling carousel में दिखते हैं, manual swipe और dots के साथ।
- Shared Shopping को customer-only रखना। Supplier, Delivery और Admin accounts shared customer lists में blocked रहते हैं।

10. Payments

Cash on delivery direct काम करता है।

Online payment backend में Razorpay keys configure होने पर काम करता है:

- UPI
- Card
- Net Banking

Wallet add money सिर्फ Razorpay online payment से होगा। Wallet में Cash top-up option नहीं है।

Wallet checkout पहले internal wallet balance use करता है। Cash on delivery अलग payment method है और wallet balance deduct नहीं करता।

Order में payment status, gross amount, Razorpay fee estimate/actual fee, net amount और admin profit store होता है।

11. Margin और Supplier Payout

Admin **Admin dashboard → Pricing, margin and payouts** से margin control करता है।

Margin priority:

1. Product margin
2. Category margin
3. Global margin

Margin percentage या fixed amount हो सकता है।

Example:

- Supplier price: ₹100
- Global margin: 20%
- Selling price: ₹120
- Razorpay fee: ₹3
- Admin profit: ₹17
- Supplier earning: delivery complete होने के बाद ₹100

Order delivered होते ही supplier payout balance automatically बढ़ता है। Admin payout request create करके processing और paid mark कर सकता है।

Payment status order के साथ store होता है।

12. Location, Device Tracking और Privacy

Location tracking permission based है।

- Customer, Supplier और Delivery accounts Android location permission allow करने के बाद live GPS location share कर सकते हैं।
- Android allow करे तो app minimize होने पर भी delivery tracking चल सकती है। ऐसे समय phone पर **Tadka & Time live tracking** foreground notification दिख सकता है।

- Support और security के लिए backend app audit records store करता है: login event, app start, app update, app version, app install ID, device model, OS version, IP address, और permission मिलने पर GPS point।
- App IMEI या hidden hardware identifiers collect नहीं करता। App अपना generated install ID use करता है।
- User Android App Settings → Permissions → Location से GPS access कभी भी बंद कर सकता है।
- Admin safety, support और delivery investigation के लिए recent telemetry review कर सकता है।

13. Auto Update

App startup पर यह API check करता है:

GET <https://pvcraving.onrender.com/app/version>

अगर नया version available है, login screen पर update dialog दिखेगा।

Current latest APK:

<https://pvcraving.onrender.com/downloads/tadka%26time1.apk>

14. समस्या और समाधान

Problem	Solution
App not installed	पुराना app uninstall करें, latest APK download करके install करें
Login failed	User ID/password और internet connection check करें
Online payment disabled	Backend environment variables में Razorpay keys add करें
Map नहीं दिख रहा	Valid Google Maps API key add करें या route button use करें
Data load नहीं हो रहा	Backend health check करें: https://pvcraving.onrender.com/health
पुराना version दिख रहा	Update link से latest APK download करें
Location update नहीं हो रही	Location permission allow करें, GPS on रखें, और Android background restriction check करें
